SKILLS

Languages:	Verilog HDL, System Verilog, C++, Python, C.
Tools/Platforms:	EDA Playground, Cadence virtuoso, Cadence NC-sim, Creo, Proteus, Cisco.
Technical Skills:	Digital Logic Design, Functional Verification, RTL Design, Network Protocols.
Skills:	Time Management, Problem-Solving Skills, Team Collaboration, Adaptability.

INTERNSHIP

VLSI Design – Summer Training (Intern stumpy):	Jul 25
About: Completed comprehensive training in VLSI design with emphasis on RTL design, digital logic design and functional verification using Verilog HDL. - Developed and simulated digital hardware modules including combinational and sequential circuits, gaining practical experience in hardware design methodologies. Tech stacks / Tools used: Verilog HDL, Xilinx Vivado, EDA Playground.	

PROJECTS

Verilog-Based Digital Password Lock:	Aug 25
- Designed and implemented a Verilog-based password authentication system to compare user input with stored credentials. - Developed synchronous clock-driven logic with asynchronous reset and verified functionality through simulation. - Enhanced understanding of RTL design, digital logic implementation, and verification using Verilog HDL Tools Used: Verilog HDL, EDA Playground.HDL.	
Microprocessor- Driven Line Following bot:	Apr 25
- Developed a microprocessor-based control system using IR sensors for autonomous path detection and navigation. - Interfaced DC motors through an L293D motor driver to control robot movement based on sensor feedback. - Gained practical experience in embedded system design, sensor interfacing, and motor control techniques. Tools Used: Microprocessor, IR Sensors, L293D Motor Driver, DC Motors.	
Arudino-Based Automatic solar tracking system for maximum sunlight efficiency:	Oct 23
- Developed an Arduino-controlled solar tracking system using light sensors and servo motors for automatic panel positioning. - Implemented sensor-based feedback control to continuously align the solar panel toward maximum sunlight. - Strengthened knowledge of Arduino programming, sensor integration, and real-time control systems. Tools Used: Arduino Uno, Arduino IDE, LDR Sensors, Servo Motor.	

CERTIFICATES

System Design Using Verilog (Udemy)	Jan 26
Programming Fundamentals using Python (Infosys Springboard)	Jan 26
Data Base Management System (NPTEL)	Sep 25

ACHIEVEMENTS

Participated and secured 2nd position in the intern school competition	Sep 25
--	--------

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology - Electronics and communication Engineering; CGPA: 6.99	Since Aug 23
Aditya junior college	Rajahmundry, Andhra pradesh
Intermediate; Percentage: 90	Mar 23
Little paradise school	Rajahmundry, Andhra pradesh
Secondary; Percentage: 100	Mar 21
